(Approved by AICTE, New Delhi, Affiliated to JNTU, Kakinada)

(Sponsored by V.H.R. Educational Society, Markapur)

Darimadugu (v), Markapur (Mandal), Prakasam District-523 316 AP

## ***2.6.1 . Programme Outcomes (POs) and Course Outcomes (COs) for all Programmes offered by the institution are stated and displayed on website***

The institute has implemented Outcome-Based Education (OBE) and utilizes a distinct approach to calculate the achievement of Course Outcomes for the courses specified in the JNTUK syllabus. This methodology allows for the assessment of individual Course Outcomes, the overall achievement of a Course, and ultimately the attainment of various Program Outcomes that are associated with the course. In order to raise awareness among students and faculty about Program Outcomes (POs) and Course Outcomes (COs), the institute is using a range of measures.

The Program Outcomes and Course Outcomes are publicly available on the college website and displayed on departmental notice boards. The institution that oversees the course has established the desired learning outcomes for each course and documented them in the academic regulatory manuals. The Program Outcomes (POs) are distributed through the Faculty Development Programs, seminars, workshops, and other departmental events.

The Program Outcome and Program Specific Outcome are communicated to faculty and students through their conspicuous display in various locations inside the institution premises, as well as on the college website. At the commencement of each semester, every Faculty member engages in discussions with students in their classrooms regarding the desired outcomes of the courses. Consequently, each student will acquire a comprehensive comprehension of the subject matter they will be taught within a specific semester.

The program outcomes are a valuable resource for establishing a structure for teaching and learning. The course outcomes enhance comprehension of the course requirements and aid in the learning process. The course outcomes provide a comprehensive understanding of the course's potential for employability, skill enhancement, and entrepreneurial opportunities. One of the aims of the curriculum is to offer job-oriented training to students, which includes providing them with employability skills.
